We respect the consignors wishes to remain anonymous and have coined lots from this holding "ex- Queens". - 2353 ★○ Slovenia, a significant collection**, the transitional period to Yugoslavia for 1919, extraordinarily specialised with a diverse range of chain breakers and much back of the book, postal history and stamps, accompanied by certificates for Zrinjscak, Ercegovic and Velickovic. Collection of the early issues of Slovenia when it was for postal purposes a separate region of the subsequent Yugoslavia, with many 1000s of mint and used stamps and covers, all well displayed and written-up in three well filled Schaubek albums. The 1919 chain-breaker issues are extensive and complicated, categorised by the lithographic and typographic printings, as well as the various paper types starting with the rough gray, then smooth white, then porous, among an example of the special control printing on cigarette paper (accompanied by Tubinovic certificate) On each of these categories there is intense specialisation on the many constant plate varieties, as well as perforation errors such as the 5f green mint never hinged pair with double vertical perforations, the 40f bister used strip of three with extra row of perfs through the middle of the central stamp, the 5f green and 25f blue mint never hinged pairs imperf between, etc. Then further methodical studies on the different sun-beam types denomination by denomination, followed by expertized bisects including 30f rose bisect on large part of stationery with Ercegovic certificate, the 3f violet and 15f blue bisects together on piece and 20f brown bisected, again on piece all signed by Schlenger, as well as further 30pf brown bisects on cover and on large part of stationery with freedom issues, this time accompanied by Velickovic certificate. The 1919/20 allegories of freedom and King Peter issues follow in similar detail, with highlights including the rouletted 60pf dark blue in mint never hinged corner marginal block of four with the lower right stamp (the 100th and last in the sheet) showing the constant white strike through 6 variety accompanied by Zrinjscak certificate leading on to the 1920 small type chain breaker with many plate varieties such as missing I in DINARA on the central stamp of 2d gray violet mint never hinged, as well as used strips of three. However possibly the best on these issues is probably the bisects including. 5p green bisected on cover with 15p and 25p, tied by Grosuplje Kolodvor railway postmarks and making the correct rate to Zagreb, Croatia. Another fascinating area is the extraordinary range of manuscript and handstamp porto overprints, types A1 and A2 with many of the manuscript examples on cover, including on large piece, a rare example of a porto handstamp on a bisect of the 10f red chain breaker, also accompanied by Ercegovic certificate, etc. A fascinating and scholarly collection of which this description is at best only an outline, there are many items here which will be very difficult to find again.
