Also sections of consular duties, insurance, exams, playing cards, cigarettes/ tobacco, court judgements, etc. virtually every conceivable fiscal function for Argentina. Then there are the different studies for the various provinces, such as Catamarca, Chaco, Cordoba, etc, each province having its own categories, i.e. patents, produce duty, fines, etc, Corrientes was also visually very striking for the general revenue portrait issue, not just the 1882s also for the long rectangular types of 1884/95 and the large band revenues, again many different types, quite remarkable in its scope, all one of a kind. Housed on Scott album leaves the collection begins with the 1859 imperfs, #1 unused with faults but 4 side-walk margins, #2 again four margins this time used with blue "O" cancel, #3 with 2 distinctly different shades again both four margined, the first with a blue oval Bogota, the second with a Cucuta Franca cancel, #4 again with 2 examples one with 4 large margins, this again with Bogota and the latter with Honda script, #6 and #6a both four margined examples, one unused and one used, followed by high value 1p carmine this with small faults. Then the 1860s including #10, #11 and #12 the latter absolutely exceptional quality. This is followed by the Arms of New Granada, with both 5¢ yellow and 5¢ buff four margined with blue oval and red letter cancels respectively, through to 1862 with 4 substantial margins including the side of the sheet of #20 used and also 4 margins on the high value #22, this time with script Pasto cancel. Then the 1863s #24 - #29 complete, mostly four margined examples including material outside the box, followed by a similar pattern with the 1864s complete #30 - #34 with some superb examples here too. The 1865 also complete, ie #35 - #42 with a wide variety of cancels followed by the 1866 also complete through to the 10 pesos, again virtually all four margined examples. Then the 1868 onwards including high values 1870s and yet again much material outside of the box, making a most impressive page with all kinds of postmark studies. A similar pattern with the 1877 imperfs followed by the 1876/79 laid paper issues, again virtually all four margined between #81 - #84. Still further imperfs 1881 through to 1883 and of course, as is standard with this collection, more material written up outside of the box, through to perforated issues 1883 onwards with page after page replete. This continues through to turn of the century and as the collection unfolds into the Cartagena issues, as well as the Barranquilla printings, yet again with lots of varieties with different kind of cancels including those used abroad. Also seen 2 superb large margins #323 and #324, the 50 and 100 pesos high values imperf. Hardly empty spaces thereafter into the 1970s where the collection then goes to back of the book, including #F1 and #F2, #F7 again well balanced margins, followed by the various registrations labels perf and imperfs through to 1925. Also present the receipt, late fee and postage due stamps, followed by the departments and then the various local issues and officials, quite extensive particularly for the issues of Antioquia, Bolivar, Boyaca, Cauca, Cundinamarca and Santander with much elusive material here, nonchalantly presented, often with well filled pages and material chock-a-block, as is the case with the classics of Colombia. Extraordinary in scope, a wonderful collection with much more here than described, offered intact as received. Estimate \$5,000 - 7,500

Thousands of stamps categorised in depth, both mint and used, incorporating one of the most methodical studies of the errors of this country at the end of WWI through to the Plebiscite in 1921. Apart from the regular first definitive numeral issues and following overprints of the same, housing multiples as well as philatelic and commercial postal history including stationery, this extraordinary study unfolds of all the sub-sections "a", "b" and "c" numbers are present. There are for example, mixed overprints of different types, roman numerals in Michel, off-sets, double surcharges, currency denominations missing, broken letters, inverted overprints, double both inverted overprints, double regular surcharges, triple surcharges, double overprints with 1 inverted, currency on top etc. Generally speaking on the errors, everything has been written up and also includes center sheet, middle sheet horizontally and vertically interpanneau panes, etc. Then with the dove bearing olive branch pictorial definitives, again different types, many shades, interpanneau pairs through to the Plebiscite overprints with and without overprints, inverted overprints, double surcharges, off-sets etc. This is a very similar pattern to the earlier definitives, again here all categorised to high values, leading on to postal history mostly commercial from places such as Kattowitz, Beuthen, Hindenburg, etc, through to Zaborze etc, including registered. The second volume has the Germania overprints, all of course signed by Dr Haertel (geprueft!), valued accordingly through to the further officials in-depth, again with double overprints, vertical overprints, diagonal overprints, double one inverted overprints, double vertical and horizontal combined and much more with virtually every possible conceivable error that is known on these issues. M with varieties, including inverted. - 2080 ★/○ German WWII Occupations, Substantial Stock.** Mainly Bohemia and Moravia and Poland Generalgouvernement. 1000s of stamps housed in a very large stockbook, with each page split in the middle, giving a parallel mint and used Michel numbering to the left and the right respectively. Also as far as our random checks go there has been a further separation of the mint never hinged from the hinged, it is definitely a "turn-key" stock. Beginning with Bohemia and Moravia first definitive series mint complete to the 10k, this is followed by an abundance of further definitives probably leaning more towards used than mint, yet nothing in excessive quantities, perhaps up to 10 of each, including occasional se-tenants. A similar pattern with Alsace-Lorraine through to Polish occupation which is very substantial with no doubt a huge retail potential running into many 1000s of dollars. An extraordinary holding, ending with large presentation folders specifically for "B & M" and further Michel specialised such as inter-panneau strips, also seen imperforate Poland etc etc, should be viewed to be appreciated. - 2105 ★/○ Greece, Fantastic Old Time Hoard.** Including strong Hermes Heads and early Olympics. Many thousands of stamps stuffed into one well filled volume stock book. Starting off with well over 100 large Hermes Heads to 80 lepta, mint and used, stuffed stamp on stamp in desperate need of organisation. Also about 250 of the small Hermes heads to 1 drachma, many superb examples noticed. Then the perforated Hermes heads with about 150, again with much potential here. This is followed by the Olympic issues firstly with the 1896 with about 200 examples to the 2 drachma with a wide range of postmarks that will delight the Olympics collector, including about 20 of the 40 lepta purple, 10 of the 60 lepta black, 10 of the 1 drachma blue and not forgetting a superb used 2 drachma with double concentric green cancel. Then follows the second Olympic issues, again in the hundreds, mint and used with at least 2 dozen of the high value drachma running Hermes, followed by the third Olympics of 1906 again to the 3 drachma approaching a couple 100 here as well, including over a dozen of the high value drachma values. Then follows an equally intense range of subsequent definitive and commemoratives issues, again all completely uncatalogued including airmails with a range of early 20th century overprints well worth investigating and the high values of the 25 drachma and definitives. The holding continues in similar strength all the way through to the 1950s, neatly stacked with each stamp showing a little of each. It is all completely uncatalogued, no doubt it will be a small fortune and the potential here is enormous. Recommended for a dealer to break up. It is also ideal for the classic postmark collector with a particular liking for the Hermes heads and early Olympics. Estimate \$1,500 - 2,000

- 2121 ★/○ **Honduras, Old Time Very Specialised Stamp Collection With Good Postal History.** 2 well filled volumes, as well as a stack of stockpages full of covers waiting to be placed into the main collection which has postal history directly incorporated into it. There are also many proofs, errors as well as much scarce and unusual postal history. The first album begins in the 19th century with Seebeck proofs of the January 6th 1890 seal of Honduras as issued by the Hamilton Bank Note Co imperforate blocks in various colors, then the 1891 General Luis Bogram issue, again imperforate plate proofs in issued and unissued colors with blocks and each denomination having 9 different color trials. Then there are the 1892s with imperf between plate proofs to 75c, the 1895s again with plate proofs in various colors, followed by the 1896 first and second printings proofs, followed by the 1896 train issue with different errors and varieties such as horizontal pairs imperf between as well as double impressions, different papers, shades, etc. Then the Official stamps of 193-1915, with regular issues, double, maybe even triple, surcharges, this continues through to the 1930s with the collectors meticulous detail and enthusiasm for the subject clearly showing through with double impressions, overprint errors, provisional issues, more imperforates, imperf between mint and used, imperf vertically, etc. Then the postal history which has many unusual and important items, beginning with an attractive strip of 3 1898 train 5¢ with line cancels sent to New York, as well as the 10¢ and 5¢ train on cover, this time sent to New Orleans, carefully written up. Also seen advertising mail, postal stationery, officials and provisionals including fancy flag cancels, as well as airmails. The second album begins with further postal history, filled to the gills with a particularly interesting study of the postal stationery of Honduras. Finally, the balance of the postal history equally intense, deserving further investigation and categorising to build into the first and second albums. A must view for the specialist, a real opportunity as collections of the caliber and detail are hardly ever on the market today, offered intact as received. Estimate \$3,000 - 4,000

- 2363 ★/○ **Baltic States, Mostly Pre-Philatelic Postal History From the 18th Century To Mid 19th Century.** Essentially Latvia with many exhibition items. An outstanding range of material housed in one battered volume with about 3 dozen or so items, primarily of Latvian postal history, from the 18th century onwards. For the most part the alphabet used is Cyrillic, as of the day. We are able to detect Riga, however there is much more here, deserving expertise and research. The condition is far better than normally encountered with some crisp clear strikes boldly juxtaposed against each other, occasionally fancy illustrated monarchical chevrons on reverse etc, as well as concentric circles, straightlines etc. Loaded with strikes from different towns, possibly from places no longer extant. - 2369** ★/○ **Europe, Old World Collection With Particularly Strong Third Reich.** Impressive 1939 Schaubek album, actually called by Schaubek "Das Kleine" ("the small one"), yet still a hefty tome! Not hinge remaindered, offered intact as received, there are many 1000s of stamps from the 19th century onwards, mint and used. Probably the best country is Germany which has a strong showing of Third Reich, for example, the 1933 Wagner series complete mint, the good watermark Hindenburg definitives mint, the 1934 officials and airmails complete to the 3rm zeppelin also the 1934 professions complete to 40pf, 1935 Trains and Costumes again both complete to 40pf, 1936 Olympics etc with many further series to 40pf purples, the good semi-postals horse of 1938, various miniature sheets etc, also better Saar 1934 to 5f complete and superb used Madonna "Volksabstimmung" complete. Starting off with the 1956 Luxembourg towers with particularly good centering with completion throughout this includes of course the Liechtenstein honeycombs of 1960, you name it whatever were the iconic stars were, they are here with Spanish Andorra 1972 and much more with a good range of the miniature sheetlets as well, through to the 1980s complete, chronologically organized. This collection is completely faultless and reflects through their stamps the history of the drive towards the United States of Europe. Considering this would have been worth \$10,000++ in 2005, this is an excellent opportunity today. Who knows which way the market will go in Europa? In any event, a perfectionists collection. Estimate \$750 - 1,000

This represents the postal history part, the used, the associated forerunners and issues made in harmony with the EU/EEC of the Europa collection complete, also offered in this auction. While not quite as comprehensive as their mint counterpart, these 3 albums as well filled with plenty of highlights inc the Swiss 1959 CEPT PTT overprints, both off and on cover, latter FDC, the used series from 1956 onwards, through to the Liechtenstein honeycomb superb used on piece, forerunners superb used such as the 1952 Luxembourg series of 6, similarly the Germany ERP, the Greek series of 6, the 1949 Italy ERP and various better NATO and other European themes. The second album consists of FDCs of the same, again virtually complete, but missing the 1956 yet 1957 onwards through to Liechtenstein honeycomb FDC and virtually everything else FDC through the 1960s/70s in pristine condition, including the scarce Spanish Andorra 1972 with many countries with a very diverse range of cachets. The final album is also interesting as it focuses on the various sympathy issues and forerunners with yet another Swiss 1959 PTT series and many hundreds of others, all over Europe, dealing with themes that connect Europe together (although not specifically EC sanctioned issues) by the year. Much expensive material too inc very high cataloguing miniature sheets of Romania, Hungary, etc, probably running into thousands of euro in their own right. Also seen the French Conseil d'Europe and further parallel issues, FDCs, EFTA complete, all the joint Scandinavian issues before they became part of the EU, etc. These three substantial albums serve as an excellent accompaniment to the superb never hinged Europa collection, as mentioned, offered separately in this auction. Estimate \$600 - 800

Worldwide Accumulations and Dealers' Stocks

- 2494 ★★ **Worldwide, Extensive New Issues Accumulation, 1980s through to 2000s.** An extraordinary accumulation weighing over 60 kilos, judging by the UPS boxes that arrived. They are all from one man that spent the equivalent of several 10s of 1000s of dollars on new issues into the 2000s. These were sent by registered post to the same address on a regular basis for approximately 25 years. For the most part the buyer merely opened up the registered letters and then closed them! There are well over 100 fat registered envelopes loaded with material. Virtually all the envelopes have the original invoices reflecting his cost, often running into hundreds of dollars each. There is also a large stack of new issue material that is outside of the envelopes and like the rest unprocessed, this part is housed in 3 boxes. All of this material is typical of what is inside the envelopes, new issues all in complete series of commemoratives, definitives, se-tenants in blocks, booklets, miniature sheets, covers, etc. This is quite a challenging lot to being to get a handle of the value of what is here, as it is very intense and hidden.
