OLYMPIC COINS

SERIES I GEOGRAPHIC

### UNCIRCULATED COINS

By Act of Parliament, Bill C-196 established Olympic Coins as legal tender of Canada in July 1973.

Coin #1, \$10, the world, symbolises the universality of the Olympic movement.

Coin #2, \$ 5, North America, with Canada highlighted.

Coin #3, \$10, the skyline of Montreal, host city to the games.

Coin #4, \$ 5, Kingston, site of the sailing events, highlights yachts against the skyline of Kingston.

Uncirculated coins are struck from Sterling Silver blanks by the Royal Canadian Mint, encapsulated in ultrasonically welded crystal styrene and packaged in mint condition. They have never been in circulation. Under the Olympic 1976 Act the number of coins minted in this series is limited. They will not be minted again.

Each coin contains 92.5% silver and 7.5% copper alloy. The \$5 coins are 38 mm in diameter with a fine silver content of .723 Troy oz. The \$10 coins are 45 mm in diameter with a fine silver content of 1.44 Troy oz.
