MAYBACH

AIRSHIP AND MARINE ENGINES

The world's most famous lighter-than-air craft have been Maybach powered . . . the first dirigible to fly to Africa—when a distance of over 5000 miles was traversed . . . the Norge on its flight to the pole and back . . . the Los Angeles . . . the Graf Zeppelin. And many of the world's finest yachts are Maybach powered, too.

† Past performances prove that to power with Maybachs is to permanently remove from one's mind the problem of motors.

550-600 H. P. MAYBACH MOTOR INSTALLED IN POWER CAR OF GRAF ZEPPELIN.

Side view of the famous Maybach type V, L-2 Directly Reversible motor, five of which provide power for the Graf Zeppelin. Full details on request.

Control-end view of the 550-600 H. P. Directly Reversible Maybach motor.

Write for complete specifications of other Maybach gasoline and Diesel engines, 60 to 600 horsepower.

THE VEEDOL-LUBRICATED HINDENBURG

BEGINS A NEW CHAPTER IN AVIATION HISTORY

4200 hp. from four Diesels speed this "flying hotel" on its trans-oceanic flights. Diesel power marks a new era in lighter than air transportation. It not only gives more economical power to the Hindenburg but permits higher speeds and greater safety. In fact, safety is promoted to such a degree that smoking is permitted.

Safety for the Diesels, from which smooth flowing power is vital, is assigned to Veedol. For more than 1,000,000 air miles Veedol has protected the power

of the Graf Zeppelin. Its performance has been proven beyond dispute. Quite logical that this finest of Pennsylvania oils should be assigned to safeguard the performance of this 4200 hp. plant of the Hindenburg.

Take a lesson from the Zeppelins. The next time you need oil for your crankcase have it filled with Veedol. Give your automobile Zeppelin lubrication protection. Bear in mind that nothing is so expensive as ordinary oil, nothing more economical than Veedol.
