

Issue of 1847

Imperforate

Printed by Rawdon, Wright, Hatch & Edson

Benjamin Franklin

George Washington

On July 1, 1847 the first official United States stamps were issued featuring the portraits of our first postmaster and our first president. The 5¢ value paid for postal service up to a distance of 300 miles, and the 10¢ value paid for service beyond this point. These stamps were issued imperforate (unperforated) and had to be cut apart with scissors. The adoption of adhesive stamps paved the way to the remarkable development of the postal system of today.

Issue of 1851-57

Imperforate

Printed by Toppan, Carpenter, Casilear & Co.

Benjamin Franklin

George Washington

Thomas Jefferson

George Washington

The rapid expansion and popularity of the postal service soon made a greater flexibility in rates and necessity. Lower rates for all distances was deemed advisable and in 1851 a new set of stamps was issued for this purpose. If pre-paid, a 3¢ stamp was sufficient to cover charges up to a distance of 3,000 miles. 5¢ was required if not pre-paid. Beyond this point the rate was six or ten cents. 24¢, 30¢, and 90¢ values are known but it is believed that they were not regularly issued.

Benjamin Franklin

George Washington

This issue marked a great milestone in postal progress. Due to the pressing need for a faster method of dispensing stamps to the public the stamps were machine perforated so that instead of being cut apart by scissors stamps were now easily and quickly separated. This set employed the same designs as the previous issue. The 24¢, 30¢, and 90¢ values were now regularly issued.

Benjamin Franklin

George Washington

UPON the outbreak of war between the states in 1861, the postal authorities found it necessary to demonitize all of the United States stamps in order to prevent usage by the Confederate States. The issue of 1861 was created as a replacement. During the war, due to the scarcity of metal coins, these stamps were used as small change.

NO GRILL

Issue of 1867

Grill

The removal of cancellations from used stamps for the purpose of reusing with intent to defraud the government caused the postal authorities to adopt the use of the grill. These metallic grills, which consisted of small square pyramids, were impressed on the stamp so that the fibers of the paper would be weakened and would completely absorb the cancelling ink and thus make cleaning for a second use impossible.

THE CONTINENTAL BANK NOTE COMPANY was awarded the contract to continue producing this series of postage stamps. To identify its product from that of its predecessor (the National Bank Note Company) secret marks were added to the retained designs through the 15¢ denomination. The 24¢, 30¢ and 90¢ values can only be distinguished by the shades. These secret marks are illustrated below:

Franklin. Dash of color added in pearl left of 1

Jackson. Closed outline of ornament left of U.S.

Washington. Shading under upper ribbon under THREE heavier.

Lincoln. First 4 vertical lines of left ribbon heavier.

Stanton. Semi-circles added in ball at lower left.

Jefferson. Crescent added in scroll ornament.

Clay. Balls in 2 crescent shaped.

Webster. Worn lines of shading in triangles and below U.S. Postage.

THE AMERICAN BANK NOTE COMPANY, having consolidated itself with the Continental Bank Note Company printed this series. Added interest for the collector is found in this issue because of the soft, porous paper used in contrast to the hard, snappy, translucent paper of the previous issues.

Issue of 1881-82

Perforated 12

Printed by the American Bank Note Co.

Benjamin Franklin

George Washington

Abraham Lincoln

Thomas Jefferson

DESIGNS of the 1881-1882 series at first glance appear to be a replica of the previous issue. Closer inspection will reveal a denser appearance in design which was due to the re-engraving of the plates. The characteristics of the recutting are shown:

- 1¢ - Lines of shading have been added to the upper arabesques, and vertical lines in the upper portion of the stamp have been deepened.
- 3¢ - About 1mm. below the "ts" of cents a short horizontal dash has been etched. The width of the shading at the side of the central oval has been reduced.

- 6¢ - Three lines can be counted from the edge of the panel to the outside of the stamp. Before re-engraving four lines were present.
- 10¢ - Four lines can be counted between the left side of the oval and the edge of the shield. Before re-engraving five lines could be counted.

Type II

A line of color appears in the white curve below "TS" of cents and "E" of Ten.

In printing this new issue watermarked paper was used for the first time on stamps intended for postage purposes. Watermarking had been used previously for revenue stamps and postcards. The watermark consisted of Double-line letters "U S P S" so distributed that each stamp on the sheet shows at least a part of the watermarking, as illustrated below.

In 1910 a single-line watermark was used for the first time by the Bureau.

THIS series of postage stamps featured elaborately engraved framed designs with the name of the person and the years of birth and death on each stamp directly under each portrait. For the first time in United States postal history an American woman, Martha Washington, graced a stamp, the 8¢ value.

Issue of 1908-17

Perforated 12
Double-line Watermark

Benjamin Franklin

George Washington

Imperforate

This series for the sake of uniformity and artistic effect featured the head of George Washington on all of the denominations except the 1¢ which portrayed Benjamin Franklin. Part of this issue was printed on a stock which was made of 35 per cent rag and are known as "bluish paper," although they are actually grayish in appearance. Most of the denominations printed on this paper are rare.

Issue of 1908-10

Coil Stamps
Perforated 12 Horizontally
Double-line Watermark

Coil Stamps
Perforated 12 Vertically

Officially issued coil stamps came into being in 1908. As the name indicates, the stamps instead of being issued in sheet form, were made available in lengths which were coiled into rolls of five hundred and one thousand. Stamps in this form were found to be more convenient for handling large quantities of mail that called for the same stamp value. These coils were also made available to private companies who were licensed to perforate them and sell them in vending machines at neighborhood stores for the convenience of the public.

Issue of 1910-14

Perforated 12

Single-line Watermark

Imperforate

This issue employed the same designs as the previous series. A single line style of watermark was used.

Perforated 10 Vertically

*Issue of 1914-16*

Coil Stamps, Rotary Press
Perforated 10 Vertically

Perforated 10 Horizontally

With the coil issue of 1914-16 a rotary press was used for the first time in printing United States stamps. Rotary press stamps are printed from curved plates and are therefore slightly larger either vertically or horizontally than flat plate printings. This process of printing enabled the Bureau to produce stamps more quickly.

*Issue of 1916-17*

Flat Plate Printing

Perforated 10, Unwatermarked

The stamps of this series were a repeat of previous issues but with differences discernible only to stamp collectors. They were printed on unwatermarked paper and the \$2 and \$5 values were previously issued perforated 12. One of the most spectacular errors occurred in the printing of this series. Sheets of the 2¢ value were found with one stamp being of the 5¢ denomination. This was found on the lower right sheet of plate number 7942. On the Upper left sheet of plate number 7942 a double error was found. These errors continued to appear in later printings of the 2¢ stamp imperforate and perforated 11 and are greatly desired by stamp collectors.

Issue of 1916-17

Issue of 1917-19

Flat Plate Printing

Perforated 11

Unwatermarked

The Bureau of Engraving and Printing was still trying to find a more suitable size of perforation. Perforation 12 was found to be too fragile and perforation, 10 was too strong, causing damage to stamps during separation. To remedy these defects perforation 11 was used for this series.

*Issue of 1918-20*

Offset Printing

Mississippi River Bridge

Issued in connection with the Trans-Mississippi Exposition held in Omaha, Nebraska, in 1898, the series was placed on sale June 10th and discontinued on December 31, 1898. The designs, many of which are considered to be among the world's most beautiful postage stamps, show the development of the great mid-west.

*Pan-American Exposition*

Buffalo, New York, 1901

Fast Lake Navigation

Automobile

Bridge at Niagara Falls

Canal Locks at Sault Ste. Marie

Fast Ocean Navigation

Placed on sale on May 1, 1901 and withdrawn from sale October 31, 1901, the dates fixed for the opening and closing of the Pan-American Exposition held at Buffalo, N. Y. The 1c, 2c, and 4c Denominations are known with inverted centers and are extremely scarce.

Louisiana Purchase Exposition

St. Louis, Missouri, 1904

Robert R. Livingston

Thomas Jefferson

James Monroe

William McKinley

Map of Louisiana Purchase

Placed on sale April 30, 1904 and withdrawn from sale on December 1, 1904. The stamps commemorate the centennial of the Louisiana Purchase and the designs picture the persons connected with the purchase and with the Exposition. Livingston, as minister to France, conducted the negotiations, Monroe as special ambassador to France in the matter of the purchase, President Jefferson during whose administration the purchase was made, and McKinley, who approved the acts of Congress connecting the government with the exposition.

Jamestown Exposition

Hampton Roads, Virginia, 1907

Captain John Smith

Founding of Jamestown

Pocahontas

Issued April 25, 1907 to commemorate the 300th anniversary of the founding of Jamestown. The leader of the founding colonists was Capt. John Smith, whose life was saved by Pocahontas when she threw herself between him and an Indian's axe. Stamps were in use during the Jamestown Exposition and withdrawn from sale when the Exposition closed, December 1, 1907. The figures in the upper corners of the 1c stamp are Pocahontas and Powhatan.

Lincoln Memorial

1909

Lincoln

Issued to commemorate the 100th anniversary of the birth of Abraham Lincoln. The design is from St. Gaudens' statue of Lincoln. The stamps were issued both perforate and imperforate, and on the experimental "bluish" paper.

Alaska-Yukon-Pacific Exposition

Seattle, Washington, 1909

William H. Seward

Issued on June 1, 1909, in connection with the Alaska-Yukon-Pacific Exposition held in Seattle, Washington, in that year, to celebrate the purchase from Russia of the Alaska territory. William H. Seward was Secretary of State and negotiated the purchase.

Issued on September 25, 1909 to commemorate the 300th anniversary of the discovery of the Hudson River and the centenary of Robert Fulton's steamship "Clermont."

Panama-Pacific Exposition

San Francisco, California, 1915

Perforated 12

Balboa

Panama Canal

Golden Gate

Discovery of San Francisco Bay

Perforated 10

First issued in late 1912 (officially January 1, 1913) the stamps served the dual purpose of Commemorating the Panama Canal and, also, publicising the Panama-Pacific Exposition planned to be held in San Francisco in 1915. The original issue was perforated 12 and later, in 1915, appeared perforated 10. Original color of the 10c was an orange-yellow. Changed, officially, on August 25, 1913, to a darker shade known to philatelists as "orange".
