Just as the Scott Catalogue warns readers not to confuse government perforations with private perforations of the International Vending Machine Company, a similar warning could be added about Covel perfs.

Boy Scouts of America

The Figure 6 precanceled coil stamp of 1922 should be listed in the Scott Catalogue. It is an unwatermarked 1-cent green George Washington stamp, Scott 481, with gauge 14 vertical perforations, precanceled "NEW YORK, N.Y.," used by the Boy Scouts of America executive council in 1922.

As privately perforated coils go, this is an elusive variety. Precancel specialists have honored it for seventy years, but it has been largely neglected by VAMPs. The earliest listing I could discover is in the Adolf Gunesh *Catalog of City Type Precanceled Stamps*, first edition, published in January 1928, which priced it at \$10, a very steep price at the time.

The stamp has been known to Scott's editors for a long time. The Question of the Month in the March 1935 issue of *Scott's Monthly Journal*

Figure 8. Stamp dealer A.W. Dunning added large holes at the top and bottom of imperforate stamps, adding an exotic touch to his mailings.

Precancel Catalog, for answers. Hoover replied:

A factor which contributes to the theory that this Perf. 14 coil was originally in sheet form, is the style of precancellation which appears on it. It is what is known in the "Official Precancel Catalog" as New York's Type 26 which is a rubber handstamp. It is very unlikely that such a handstamp presumably of 25 subjects (5 x 5) would, or could, be used accurately on a "string" of stamps as coil stamps would appear. It is rec-

To my knowledge, the make of the machine in which they were used, is not known and likely one of obscure make because of the lack of that size of perforation (No. 14) existing on any other U.S. coil stamps.

The identification and location of such conditions is dependent entirely on the existence of covers showing the return address which is the condition in this case.

William Cummings, associate editor of the Scott Catalogue, revisited the subject in the *Scott Stamp Monthly Catalogue*, Column for June, 1994, titled
