SOLID COMFORT THE "WONDER ON WHEELS"
 TONGUELESS, Self-Guiding.
 SIX OR EIGHT HORSES,
 depending on size of plow and kind of work.

Uses wheel landside, which resists pressure of four furrows. No bottom or side friction. Weight of furrows, frame and plowman carried on three greased spindles. Draft reduced to lowest possible limit. Foot brake prevents Gang running on team. Levers and turning device within easy reach.

LIGHTER DRAFT than any Gang in America. Adjustable frame—can be narrowed or widened at will. Made with stubble, sod and stubble, or breaker bottoms. Ten or twelve inch cut.

**12 ACRES
 A DAY
 instead of
 three.**

**ONE MAN
 instead of four.
 Especially adapted
 to Traction Engine.**

INTERNATIONAL HARVESTING COMPANY OF AMERICA (INCORPORATED), CHICAGO
SIBERIA—A Harvest Scene near Tobolsk, where American Harvesting Machines are working their way into favor.

This cover shows John Abell's Triumph portable engine that won 9 Gold Medals in Toronto in 1881. One can only imagine how many times this machine broke down or got stuck in the mud when the first farmers started using it, but it was the best in the world at that time.

COPYRIGHT 1910—INTERNATIONAL HARVESTER COMPANY OF AMERICA (INCORPORATED), CHICAGO

FRANCE—The modern self-binder is found throughout France, though the machines as a rule are operated with oxen.

SPAIN—In this land of romance and song, Modern Agricultural Machines are making farming a profitable business.

BUCKEYE 12-FEET JUMBO RAKE.

A 9, SPRINGFIELD BUCKEYE
JUMBO
12-Foot Spiral Spring Hay Rake.

This Rake is constructed just like our A 3, except that it is **Twelve Feet Wide**, and has 28 teeth. Like A 8, it is a Two-Horse Rake.

We will furnish any of these Rakes with pole, double and single trees, instead of shafts, when desired, at a reasonable additional expense.

These Rakes are all neatly painted, striped and varnished; for workmanship and finish are not excelled by any other rakes in the market.

Our very extended experience years as manufacturers of agricultural implements, besides our practical experience in the field in using them, has given us a good idea of just what is needed, and should be some guarantee as to the quality of the machines we send out. We, therefore, invite your careful examination of these Rakes, and are confident they will meet your wants.

Call on our Agent and inquire for the SPRINGFIELD BUCKEYEs.

Dear Sir,-

Although we are well aware of the fact that you do not wish very much lost time; but under the unfavorable conditions that exist just at present we believe you will agree with us when we say that to travel and try to get orders this blustry and stormy weather will harm a man almost to the extent of unfitting him for the race when the time comes that orders can be got, and right now while the prospects are so dark we ask you if you do not think it best to lay off a week until we can see just a glimmer of better conditions. If, however, you have some thing that you feel is in urgent need of your immediate attention you had better attend to it.
