Fortress Gibraltar  
in the  
Eighteenth Century

The beginning of the century saw the fortress being much defended by Spain and in August 1704 it was captured by an Anglo-Dutch fleet commanded by Admiral Rooke. Within a few months Gibraltar underwent the first of the many sieges it would successfully resist that century.

In 1729 Knabport Gate became the sole means of entry into Gibraltar from the land side while its sea approach was guarded by a number of bastions. One of the most notable bastions of our coast during this period was the Duplestern Bastion built by Sir M. P. Barber R.A. while serving in Gibraltar in 1761.
