Made in
Germany

Enclosed we have the pleasure of sending you the first Danish **Trial Print**, presented to the Danmarks Filatelist Forbund (the Danish Philatelic Association) by the Danish Post Office as a »golden handshake« for the benefit of the Association's work for philately in Denmark.

On the stamp you will find the word »prøve«, which means »trial« or »experiment«, and it indicates that it is **no »essay«**, but the result of some »trial«. The die itself is the same superior item, which Mads Stage and Czeslaw Slania jointly made for the adaptation of the new printing machine, the M4, of the Danish Stamp Printing Office.

The **paper** makes the difference!

For the trial printings in question Danish paper has been used experimentally, manufactured by the highly esteemed Silkeborg Papirfabrik (Silkeborg Paper Manufacture). All the Danish stamps, which have been produced on fluorescent paper - and many others - have for many years been printed on imported paper, whereas our oldest stamps were printed on Danish paper from the Strandmøllen Paper Mill a little to the North of Copenhagen. In other words: what you hold in your hand is a bit of Danish Postal History!

The manufacture at Silkeborg was started at the middle of the past century by Michael Drewsen, a brother of Christian Drewsen of the Strandmøllen Paper Mill, which delivered the paper for the first Danish stamp, the 4 RBS. The two brothers were engaged by their father's, viz. Johan Christian Drewsen's manufacture at the Strandmøllen. They took over the manufacture in 1848, expanding enormously during the following years by starting the manufacture at Silkeborg and at several other mills at the river Mølleåen. In 1889 they concentrated the manufacture under the today so well known firm A/S De Forenede Papirfabrikker (The United Paper Mills Ltd.).
