OHMITE

OHM'S LAW CALCULATOR

SOLVES ANY OHM'S LAW PROBLEM WITH ONE SETTING OF THE SLIDE

THIS SIDE UP TO
1000 OHMS

OHM'S LAW FORMULAE

For Reference Purposes

W = Watts	EI	I ² R	E ² /R		
E = Volts	IR		W/R	W	I
I = Amperes		E/R	W/E		
R = Ohms	E/I			E ² /W	W/I ²

1 FIND VOLTS, AMPERES, WATTS, RESISTANCE ON SCALES ABOVE

WHEN OHMS ARE KNOWN: Move slide to set ohms over arrow. Then read each unknown factor opposite a known factor ON THE SAME pair of scales.

WHEN OHMS ARE NOT KNOWN: Select pair of scales containing two known factors and move slide to set the known values together. Then find one of the known values ON ANOTHER pair of scales. Opposite this value you will find the third unknown factor. Read Ohms over arrow.

Examples: With ohms 200, and amperes .3, find volts and watts.

Solution: Move slide to set 200 ohms on Scale G over arrow. Find .3 amperes on Scale F. Above it on Scale E read 60 volts. Find .3 amperes on Scale C. Below it on Scale D read 18 watts.

With watts 100, and volts 220, find amperes and ohms.

Solution: Move slide to set 220 volts on Scale B under 100 watts on Scale A. Find 100 watts on Scale D and read .46 amperes above it on Scale C. Read 460 ohms on Scale G above arrow.

160	11
200	13

300 OHMS

2 FIND STOCK NUMBER OF STANDARD UNITS

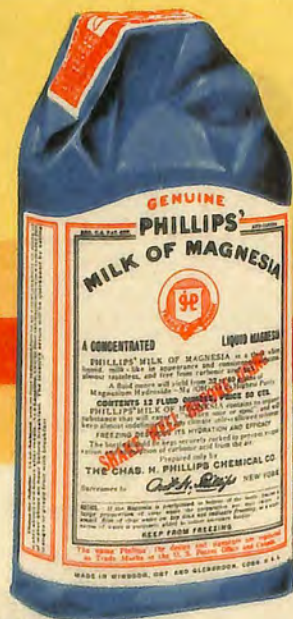

All Items Are in Stock for Immediate Shipment
Move slide to set ohms required in small window. Then read the Stock No. (including the 2 figures on the case) opposite the wattage of the desired kind of unit. "B.D." indicates Brown Devils, which are ordered by name, wattage (10 or 20) and ohms. The stock wattage size next larger than the actual watts to be dissipated is the smallest unit which can be used. A larger size unit can be used to reduce operating temperatures. Current ratings of Dividohms and rheostats must not be exceeded even though only a part of the resistance is in the circuit.

See our Stock Catalog for details.

10.00

(UPI) MINNEAPOLIS, JAN. 20--LIKE FATHER, LIKE SON--George Mikan, former college and professional basketball star, still likes to keep a hand in the game, with sons Terry, left, and Larry, right. Big George sometimes shoots with them on a backyard court at their suburban Minneapolis home. The boys get most of their court work at Benilde High School. Larry, 16, is 6-feet-4 and regular center on the prep team, while Terry, 12, and 5-feet-8, is a regular guard on the B squad. (AP WIREPHOTO) (Jal40500trib) 1965 (see AP wire story)
