BOTTOM DOUBLE PANE OF 50 OF THE 5 CENTIME #159.

GC PRINTINGS OF 1918 ON WHITE PAPER

Three such double panes formed the sheets of 150. The Millesime, in this case the numeral 8 between the stamps of the second row, denotes the year of Printing, not of issue. These numerals were interchangeable. The series of letters and numeral under the third and fourth row of the left pane can be translated as follows "G 401 27" means "printed by operator G, on the fourth day of the first month on Press number 27. The colored cross is a "point de repere" as an aid for perforating, the cut out design is a control mark. GC signifies Grande Consommation paper, of poor quality.
