Registered commercial cover (bank mail) franked with a large block of ten 5 pruta stamps of the Doar Ivri issue (#2). Three tabs are included and all are the type A setting but the "hay" beginning the 4th line of the right hand tab is bent. This tab can be localized to the 10/8 position by the presence of the "chain" or "channel" variety which is seen in the second stamp from the left in the upper row and is a constant variety known to be in position 8/7. The cover bears a Mandate type registration label of Tel Aviv-11 No 3500 and the cover is postmarked Tel Aviv 18-4-1949 and back-stamped upon arrival at Kefar Sava the following day. No doubt it was the replacement of bent or damaged letters such as this which led to some of the other tab varieties!

Unusual combination of cancellations on a commercial (?) cover. The envelope #2 with the engraved or imprinted 15 pr. Negev Camel stamp was franked additionally with a short tab of C1 and full tab of C2, the two lowest values of the first airmail series officially issued 25 June 1950. This cover bears two Qiryat Hayim cancellations dated 26 June 1950 which, no doubt, was the first date these stamps were available at that post office. The stamps were further cancelled with an Acre cancellation 27 June 1950! The cover apparently was held by a philatelist and subsequently franked with a tab of the 15pr. KKL stamp issued 24 June 1951 and this stamp and the cover backstamped with the Haifa 24 July 1951 special cancellation commemorating the 47th anniversary of the death of Herzl. For some strange reason the cover also bears the official cachet for Day of Issue, though there is no corresponding stamp or cancellation!!

Registered commercial cover bearing a pair of the 20 pruta Doar Ivri issue (#5) and postmarked in Safad 10-8-49. The cover is backstamped with two similar cancellations and despite being registered has no arrival cancellation from Tel Aviv, the city of the addressee. The cover bears a Mandate type registration label Safad No 1233.
